Foreword

The articles in the present Review are based on lectures given during the second University of Joensuu – UNEP Course on International Environmental Law-making and Diplomacy, which was held from 14 to 26 August 2005 in Joensuu, Finland. The first Course was arranged in Joensuu in 2004. The proceedings of that course were published in the 2004 Review.¹

The aim of the Course was to convey key tools and experiences in the area of international environmental law-making to present and future negotiators of multilateral environmental agreements. In addition, the Course served as a forum for fostering North-South co-operation and for taking stock of recent developments in the negotiation and implementation of multilateral environmental agreements and diplomatic practices in the field.

The Course is intended to be an annual event designed for experienced government officials engaged in international environmental negotiations. In addition, other stakeholders such as representatives of non-governmental organizations and the private sector may apply and be selected to attend the Course. Researchers and academics in the field are also eligible. Altogether 47 participants from 39 countries, with an equal distribution from the North and South, as well as between genders, participated in the second Course.

We would like to express our gratitude to all of those who contributed to the successful outcome of the second Course. It gives us great pleasure to recognize that the lectures and presentations given during the Course are now recorded in this Review. We are grateful that the authors were willing to take on an extra burden after the Course and transfer their presentations into article form thereby making the Review such a useful resource. In addition, we would like to thank Marko Berglund for skilful editing of the Review and the Editorial Board for providing guidance in the editing process. As we approach the third Course, we welcome the participation of the University of KwaZulu Natal, South Africa, in the project and look forward to the Course being held in South Africa in June/July 2007.

Professor Perttu Vartiainen
Rector of the University of Joensuu

Shafqat Kakakhel
Officer-in-Charge and Deputy Executive Director of UNEP

¹ For an electronic version of the 2004 Review please see the University of Joensuu – UNEP Course on International Law-making and Diplomacy website, www.joensuu.fi/unep/envlaw.
Preface

The current Review seeks to provide practical guidance, professional perspective and historical background to practitioners, stakeholders and researchers working in the area of international environmental law-making and diplomacy. The Review highlights dominating doctrines, approaches and techniques in the field, including international environmental governance, sustainable development, international environmental law-making, environmental education and empowerment, and compliance. Moreover, the second volume focuses on forests as a special theme.

The lectures of the second University of Joensuu – UNEP Course on International Environmental Law-making and Diplomacy, from which the articles in the present Review emanate, were delivered by experienced hands-on diplomats, government officials and members of academia. One of the main purposes of the Course was to take advantage of the practical experiences of experts working in the field of international environmental law-making and diplomacy. Consequently, the articles in this Review and the different approaches taken by the authors reflect the lecturers' and resource persons' diverse professional backgrounds. The editorial board of the Review also wished to give the opportunity for participants to the Course to submit papers. Two such articles are published in this year's Review. Overall, the articles in the Review represent various aspects of the broad and complex field of international environmental law-making and diplomacy.

Marko Berglund edited the Review and checked the style and content of the submissions. He also provided research assistance by checking, adding and editing references and footnotes. All Internet references were valid as of 31 March 2006.

The present Review is divided into four sections. Part I addresses general issues relating to international environmental governance. Donald Kaniaru's article addresses the period leading up to the Stockholm Conference and looks at the process leading to the birth of the United Nations Environment Programme (UNEP). Shafqat Kakakhel's article presents an overview of UNEP's role in international environmental governance from its birth through to the present day. Ahmed Djoghlaf focuses on the Global Environment Facility and its role in financing sustainable development. Looking at smaller-scale projects within international environmental governance, Frits Schlingemann introduces the Environment and Security Initiative.

Part II addresses international environmental law and law-making. By way of introduction, Ed Couzens presents international environmental law from a historic
perspective, looking at the role individuals and disasters have played in developing international environmental law. Tuomas Kuokkanen picks the principle of permanent sovereignty over natural resources and maps its evolution in the context of the law of natural resources and international environmental law. Addressing the theme of international environmental law-making more specifically, Ivana Zovko looks at regime effectiveness. Elizabeth Maruma Mrema also addresses the issue of effectiveness by looking at various ways to increase states’ compliance with environmental regimes. Tim Cadman identifies the role of non-governmental organizations within international environmental law-making. To maximize the capacity of individuals and organizations to participate in environmental law-making, Akpezi Ogbuigwe focuses on the key role of education and introduces the UN Decade of Education for Sustainable Development.

Part III is dedicated to the special theme of the second University of Joensuu – UNEP Course: forests. Michael Kidd takes a regional approach and introduces forest issues from an African perspective. Tiina Vähänen continues by looking at the role forests can play in achieving the Millennium Development Goals. Pekka Patosaari then presents the current state of forest negotiations with an overview of the United Nations Forum on Forests. The focus again turns to Africa in Barbara Ruis’ article in which she outlines African countries’ position within the UNFF process. Marc Pallem aerts and Katia Bodard look at the illegal trade in tropical timber and identify possible avenues to explore in curbing it. Moving to the national level, Anders Portin introduces forest legislation and governance in Finland.

Part IV of the Review reflects the interactive nature of the Course. During the Course two negotiation simulation exercises were organized to introduce the participants to the real-life challenges facing negotiators of international environmental agreements. Participants were given individual instructions and a hypothetical country-specific negotiating mandate and were guided in the two simulation exercises. Excerpts of the exercises are reprinted in this Review. The comprehensive set of negotiating documents from both exercises is available on the Course website.
